Discover the healing effects of the BioMat!

HeartSprings
 Improving Quality of Life since 2008

BioMat Professional

The BioMat is a thermotherapeutic device that generates far infrared rays and negative ions to manage pain, relax muscles and temporarily increase local circulation. Far infrared rays are exceptionally useful in relieving minor muscle and back pain, minor joint pain and stiffness, joint pain associated with arthritis, minor sprains and strains, and muscle spasms.

It is a US FDA licensed class II Medical device 2954299, based on Nobel prize-winning scientific research pioneered by NASA and developed using pure, natural materials. Many insurance companies consider the use of the BioMat as a viable treatment option for pain as well as other musculoskeletal problems.

The BioMat, as a healing tool, utilizes the triad of **Far Infrared Rays (Heat/Light)**, which penetrate deeply into the body and change your system by facilitating blood circulation and increasing oxygen to your muscles, stimulating your cells and activating 3000 essential enzymes; **Amethyst Crystals**, which help to detox, clear blockages, and relax and calm the nervous system; **Negative Ions**, which make you feel good.
